

Espionage Research Institute International Conference Video Archives

1 TB Portable External Hard Drive

This hard drive contains the full ERI conference video archives from 1999 to the current year all of which are located in the ERII-CONFERENCE-VIDEO-ARCHIVE folder. It includes Video CD files as well as all existing Continuous Playing (Long Playing = LP) MPEG 1 & MPEG 2 video files. The chart below shows the video files contained on this hard drive. This is a new hard drive which also contains pre-existing Seagate hard drive management software that you may use or remove as preferred. The video conference files are about 700 GB in size so there is room left on the hard drive for other storage.

Indexes in Word DOC & Adobe PDF formats for each year are also on this drive in the ERI-CONFERENCE-VIDEO-ARCHIVE folder. To aid in text\word\name searching the Indexes were also saved in text format and combined into one file as : Index-1999-20XX-video-archive.txt.

Beginning in 2017 the CD-ROM's will be discontinued in favor of a single USB Flash Drive containing each day's conference presentations in a single-continuous video file in MPEG1 format.

ERII Conference Year	Video CD Files MPEG-1 Format	Continuous Playing MPEG-1 Format	Continuous Playing MPEG-2 Format
1998	Not Available	Not Available	Not Available
1999	●	Not Available	Not Available
